HAMILTON BEACH
Home **DRINK MIXER**

Hints On the Use and Care of Your **HAMILTON BEACH** **HOME** **DRINK MIXER**

Your Hamilton Beach Home Drink Mixer does exactly the same job as the Hamilton Beach mixers you see behind soda fountains everywhere. It blends ingredients and aerates them. This "aeration" or "fluffing" is the difference between ordinary mixed drinks and the smoothness, taste and appearance you will get in drinks made on your drink mixer.

To mix a drink, put your ingredients in the plastic mixing cup. Place the cup in position on drink mixer. Plug in the mixer. Turn switch at top of mixer to "On," and the mixing process begins.

When the drink is mixed to proper consistency, remove the cup from the mixer before shutting off the motor. This permits the agitator and shaft to clean themselves. If you shut off the motor before removing the cup, some of the mixture will adhere to them.

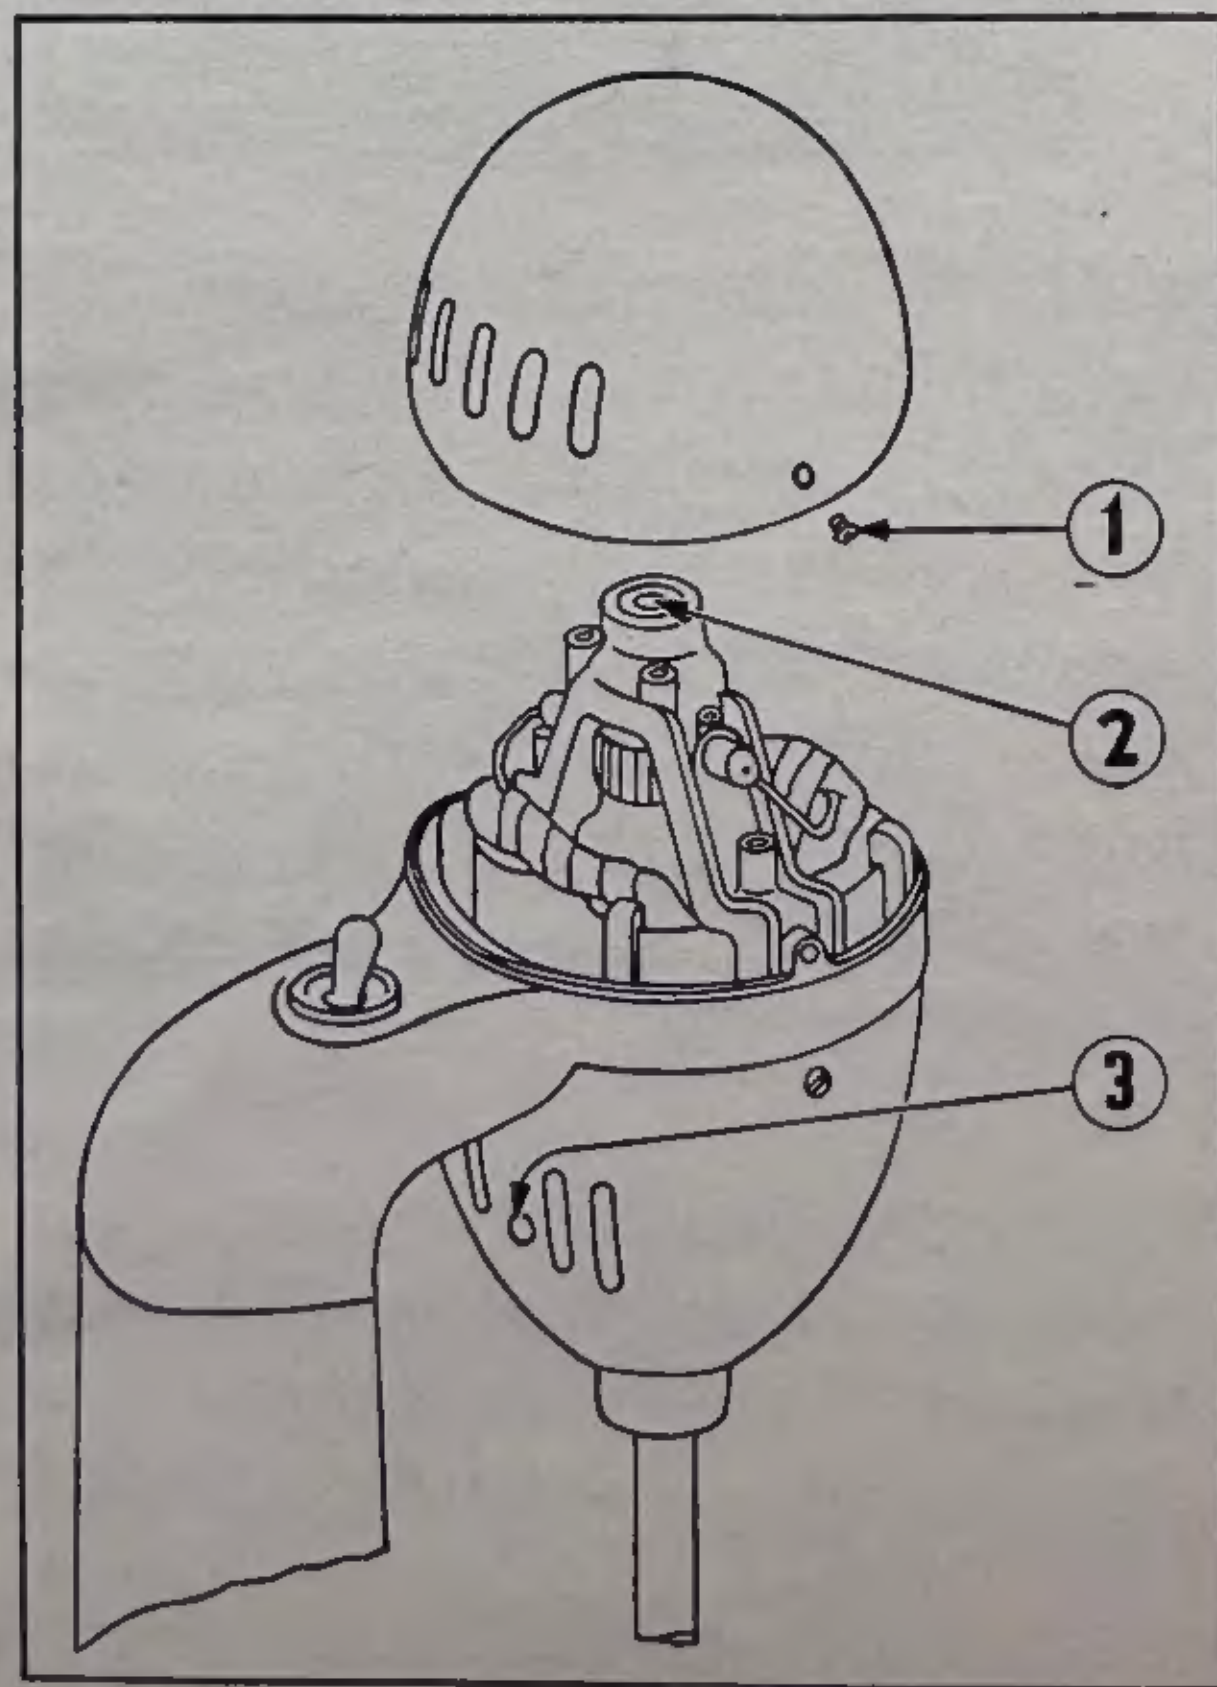

The mixing cup is 20-ounce capacity, but do not attempt to

mix more than 16 ounces (2 cups). Aeration increases the amount of liquid, and when the cup is overloaded agitation will cause spillage.

In handling your drink mixer, do not grasp by the agitator shaft, but by the back column. Handling by the agitator shaft may bring it out of alignment.

To clean agitator shaft, place water in mixing cup, put on mixer and turn on. Never put the mixer in water to clean. Just wipe with a damp cloth and dry.

WARNING: The Polystyrene cup will withstand normally hot dishwater but not the excessive heat produced in some automatic dishwashers.

Oiling Guide

Use only light machine oil. Put 4 or 5 drops of oil in oil hole at point 3 (see diagram) every 50 hours of operation. After 200 hours of operation remove two screws at point 1 and lift off top. Then put 4 or 5 drops of oil in felt wick at point 2.

"Re-FRESH-ing"
Frozen
Concentrated
Orange Juice

When packers concentrate orange and other fruit juices, they remove the air from it. They tell you to add water, and restore the air by mixing or stirring. The best way to do this is to aerate with your drink mixer. Just put your combination of concentrated juice and water on the mixer for a minute. You'll be amazed how this restores the fruit freshness of the juice.

Mixing Fruit and Bar Drinks

Leading bars the country over use Hamilton Beach Drink Mixers in mixing such drinks as sours, Collins, Daquiris. This is because the mixer gives the aeration and "fluff" that adds to their smoothness and flavor. You can achieve the same professional results with your Hamilton Beach Home Drink Mixer. The same effect is gained by making lemonade and other fruit drinks on the mixer.

Making Real Fountain Drinks

You will get the best results on fountain drinks when all ingredients are kept at refrigerator temperature. This helps aeration and improves taste.

The recipes that follow are adaptable to many changes of content and flavors. The ice cream drinks may be made heavier or lighter to suit your taste. These recipes are offered as suggestions on which you can build your own home soda fountain operation.

Fountain Style Chocolate Malted Milk

8 tablespoons ice cream
 $\frac{3}{4}$ cup milk
1 tablespoon chocolate syrup
1 tablespoon malted milk powder

Put ingredients in cup in order listed, place on mixer, and mix 2 to 3 minutes depending upon temperature of ice cream and milk.

Fountain Style Chocolate Milk Shake

Add 1 scoop crushed ice.
Blend on mixer until ice melts (about $1\frac{1}{2}$ minutes).

Fountain Style Tropical Malted Milk

Put 2 tablespoons pineapple syrup in mixing cup.

Add 3 tablespoons ice cream.
Add $\frac{1}{2}$ cup milk.

Add one heaping tablespoon malted milk.

Blend on mixer for not more than one minute.

"Boston Cooler"

Put 2 tablespoons root beer syrup in mixing cup.

Add 3 tablespoons ice cream.
Add $\frac{3}{4}$ cup milk.

Add one heaping tablespoon malted milk.

Blend on mixer.

Purple Cow

$\frac{1}{4}$ cup grape juice
 $\frac{1}{2}$ cup cold milk
8 tablespoons ice cream

Blend on mixer.

TV-Teen Club Special

1 tablespoon strawberry preserves to one 8-ounce glass of milk. Mix till blended.

This may be made with any desired preserves or marmalade.

Vanilla Milk Shake

- $\frac{1}{4}$ cup cold milk
- $\frac{1}{2}$ teaspoon vanilla extract
- 6 heaping tablespoons vanilla ice cream

Combine all ingredients in mixer cup, and beat until well mixed and airy.

Yield: 1 cup.

For chocolate add two tablespoons chocolate syrup.

Banana Milk Shake

- 1 medium size ripe banana
- $\frac{1}{4}$ cup cold milk
- 6 heaping tablespoons vanilla ice cream
- Pinch salt

Cut and mash the banana in the cup. Add remaining ingredients, place on mixer and mix until well blended and frothy.

Yield: $1\frac{1}{2}$ cups.

Mocha Milk Shake

- $\frac{1}{2}$ cup cold double strength coffee
- $\frac{1}{2}$ cup cold milk
- 2 tablespoons sugar
- 6 heaping tablespoons chocolate ice cream

Combine in mixing cup and mix until smooth.

Molasses-Ginger Shake

- 1 tablespoon lemon juice
- $\frac{1}{2}$ teaspoon ginger
- $\frac{1}{4}$ cup cold milk
- 6 heaping tablespoons vanilla ice cream
- 2 tablespoons dark molasses
